

ING. JOSE ANTONIO CHAVERRI CESPEDES

Description

Bilingual Software Development Engineer with experience in object-oriented programming and web application development. My expertise focuses on back-end development, where I efficiently manage both relational and non-relational databases. I have a solid ability to design and develop scalable software systems that meet the highest industry standards.

Formal Education

Bachelor's in software engineering / Cenfotec – December 2024

Software Development Technician / Cenfotec – December 2023

Professional Development

Python Essentials I and II / Cisco Academy Network - 2023

JavaScript Essentials / Cisco Academy Network - 2023

Scrum Fundamentals / SCRUMstudy - 2023

Intensive English / Costa Rica Technology Foundation – 2021

Advanced Excel / UCR Technology Academy – 2020

Work Experience

October 2023 – Present: **Xaverri.com** (Freelance) / Senior Design Engineer

- Full-stack developer, combining technologies such as Java, HTML, CSS, JavaScript, and SQL.

Soft Skill

- Effective Communication: I believe I can communicate clearly with both technical and non-technical audiences.
- Responsibility: I strive to complete projects by meeting client expectations within agreed timelines.
- Problem-Solving: I am skilled at analyzing problems and complex situations to find efficient solutions.
- Creativity: I aim to provide innovative and unique solutions to the projects I undertake.

Additional information

- English C1
- Knowledge of Python, C++, C#, .Net
- Advanced proficiency in Microsoft Office.
- Valid US Visa and passport
