Eng. Cinthia Morales Chacón
FOTOSTUDIO S.A.

Reference: Web Application – E-Commerce Project for Photography Studio

Through the Xaverry.com brand, I am pleased to offer you my services for the development of an E-Commerce web application aimed at marketing your photographic products. This proposal contains a detailed outline of the project scope based on our platform planning meetings, with the objective of not only meeting but also exceeding your expectations for the final product.

For your reference, you may visit www.xaverry.com, where you can view examples of projects we have successfully developed.

Scope – Development of Application and Web Hosting

- The application to be developed will be an E-Commerce style web application for the sale of photographic services.

- The domain www.fotostudio.com will be provided as requested in the platform planning meetings. This is subject to availability at the time of signing the contract for this offer.

- The creation of the web platform will be carried out in .NET Core.

- The following pages will be developed:

    - Landing Page: The landing page will provide a general overview of the company and will list the services to be offered to customers on the platform, which they can eventually purchase in the shopping cart section.

    - Login: Conventional login screen via email/password, with an option to recover the password by sending a temporary password to the registered user's email.

    - User Registration: Page where users wishing to purchase services can register on the platform.

    - User Profile: Page where users can edit their registered personal information.

    - Shopping Cart: Page where users can finalize their purchase of services selected on the landing page. Only the "Sinpe-Movil" payment method will be available, via the submission of a payment receipt from the user.

    - Service Creation: Page where the administrator can manage the creation, editing, search, and deletion of services to be offered on the platform.

    - Contact Form: Page where users can request information or resolve any issues that arise when purchasing services.

- User role management will be implemented on the platform.

- Integration of a chat feature with WhatsApp will be included.

- Creation of the database in SQL language, hosted on the Azure platform, will be provided.

- The website will be responsive.

- The website will be responsive.

- Provision of two private email accounts with the domain "@fotostudio.com" is included. The following addresses are proposed, though the final decision rests with the client:

  - info@fotostudio.com

  - cmorales@fotostudio.com

- The application will be stored on a web hosting service. The hosting fees can be paid either monthly or annually.

Economic proposal – Web Platform

Desciption	Cost ($)
Creation of the E-Commerce style web platform "www.fotostudio.com"	**$ 1,350.00**
